 2006 IECC ☐ 2006 UPC ☐ MISC. ☒

CODE SECTION: Administrative Policy and Procedure

TOPIC: 235 Inspections

PURPOSE/REASON: Provide direction for dispatch and field inspectors when 235 inspections are to be completed

INTERPRETATION: All 235 inspections will be performed during normal working hours unless one of the following conditions exist:

1. An Emergency Generator is powering the required emergency egress lighting, and the facility cannot be put onto generator power during normal working hours.
2. The Emergency egress lighting is powered by a central Emergency Power UPS system, and the facility cannot have the normal power shut off during normal working hours to verify the operation of the UPS system.
3. The facility is an up and operating business and verification of the system through disconnection of some of the lighting circuits would create a disruption of the business.

If a contractor requests an after hour 235 inspection for other than the above stated conditions they shall be directed to contact the area supervisor.

Approved: Chris Knight, Building Official
